# 1. Introduction — What This Portal Does

---

A plain-language overview before you begin.

The **UAE Portal** is the online system Ugenya Association Eldoret (UAE) uses to run its savings and welfare activities for all 12 branches. Before this portal existed, everything — membership lists, monthly savings, emergency fund contributions, funeral collections — was tracked on paper. The portal keeps all of that information in one secure place that can be reached from a phone or computer, anywhere there is internet access.

As an **Administrator**, you are the person who types the real, day-to-day figures into the system on behalf of members. Members can only look at their own records — they cannot see anyone else's savings or edit anything. Your work is what makes their view accurate.

With an administrator account, you can:

- Add, search, view, and update member records for every branch.
- Import many members at once from a spreadsheet (CSV) file.
- Open each branch's monthly contribution sheet and record savings and emergency fund entries.
- Record one-off funeral or emergency collections.
- Track income and expenses for association-run business activities (for example, the van hire business).
- Generate official PDF reports — monthly ledgers and financial summaries.
- Post announcements to all members, or to specific branches only.
- Download printable blank collection sheets for use at physical branch meetings.

## WHO THIS GUIDE IS FOR

This guide covers everything an Administrator can do in the portal. It does not describe any additional, higher-level account used only for very rare, system-wide setup tasks — if you ever need something this guide does not cover, contact the person who manages the system for the association.

## 2. Getting Started

---

What you need before your first login.

### 2.1 What you need

- A smartphone, tablet, or computer with a web browser (Chrome, Safari, Edge, or Firefox all work well).
- An active internet connection (mobile data or Wi-Fi).
- Your administrator login — either your **Member ID** or your **email address**, plus your **password**. These are issued to you by the association; if you have not received them yet, ask the person who manages the system for the association.

### 2.2 Finding the site

- 1 Open a web browser on your phone or computer.
- 2 Type the following address into the address bar at the top of the browser:  
**ugenyassociationeldoret.com**
- 3 Press Enter (or Go). The UAE homepage will load.

#### TIP

Save this address as a bookmark, or add the site to your phone's home screen (see Section 3), so you don't have to type it every time.

### 2.3 A quick look at the homepage

Before logging in, the public homepage shows information anyone can see: what the association offers (Monthly Savings, Emergency Fund, Welfare & Accountability), an "About UAE" section, the list of all 12 branches, how contributions work, a membership section with a downloadable application form, and a **Login** button that takes you to the sign-in screen.

## 3. Installing the Portal as an App (Optional)

A faster way to open the portal — no browser address bar needed.

The UAE Portal can be installed like a regular app on your phone or computer, even though it lives on the web. Once installed, it opens in its own window with its own icon, just like any other app, and starts faster.

### 3.1 If you see an "Install App" button

On the homepage or your dashboard, you may see an **Install App** button near the top of the page. If you see it:

- 1 Tap or click **Install App**.
- 2 Your browser will show a confirmation prompt — confirm to install.
- 3 An "UAE Portal" icon will appear on your home screen or desktop. Use it to open the portal directly from now on.

### 3.2 If you don't see that button

Some browsers (notably Safari on iPhone/iPad) don't show this button automatically, but you can still add the portal to your home screen manually:

- **iPhone/iPad (Safari):** open the site, tap the Share icon (a square with an arrow pointing up), then choose "Add to Home Screen".
- **Android (Chrome):** open the site, tap the three-dot menu in the top right, then choose "Install app" or "Add to Home screen".
- **Computer (Chrome/Edge):** open the site, look for an install icon at the right edge of the address bar, or use the browser's menu and choose "Install UAE Portal".

#### NOTE

Installing is entirely optional. Everything in this guide works exactly the same whether you use the installed app or simply open the address in your browser.

## 4. Logging In as an Administrator

Administrators sign in directly — no branch selection needed.

### 4.1 Step-by-step

- 1 Go to [ugenyassociationeldoret.com](https://ugenyassociationeldoret.com) and click **Login** (top right of the homepage, or in the "Your Records, Online" section).
- 2 You will land on the sign-in screen, headed "**Member Login**" — this same screen is used for both administrators and members; it recognises your account type automatically.
- 3 In the **Member ID or Email** box, type your administrator Member ID or your email address.
- 4 In the **Password** box, type your password. Tap the eye icon on the right of the box if you want to check what you typed before submitting.
- 5 Click **Login**.

If your details are correct, you will be taken straight to your Administrator Dashboard (Section 5).

### 4.2 Messages you might see

| MESSAGE                                                                             | WHAT IT MEANS                                                                                                                                                                                           |
|-------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| "Too many login attempts. Please try again in 15 minutes."                          | The system limits repeated login attempts for security. Wait 15 minutes and try again, and double-check your password.                                                                                  |
| "This login is for members. Administrators should use the direct admin login link." | You reached this screen through the branch-selection page used by members. Go back to the homepage and click <b>Login</b> directly, or use the "Admin? Login here" link on the branch-selection screen. |

#### TERMS & PRIVACY

A link to the Terms & Privacy Policy is shown just below the login button. It's worth reading once, as it explains how member data is handled.

# 5. The Administrator Dashboard

Your home screen after logging in — a snapshot of the whole association.

## 5.1 The top bar and menu

At the top of every screen (once logged in) you'll see a dark navy bar with:

- A **menu icon** (three lines) on the left, and a round **initials badge** on the right — either one opens the navigation menu.
- The navigation menu (a panel that slides in from the left) lists every section you can reach:  

Dashboard, Branches, All Members, Business Activities, Financial Summary, Funeral Collections, Monthly Ledger Report, Announcements, Constitution, Settings, and a Logout button at the bottom. It shows the label "MAIN ADMIN PORTAL" under the association name, confirming you're in the correct area.
- Tap anywhere outside the menu, or the X in its corner, to close it.

## 5.2 Dashboard summary cards

Four dark cards near the top give you an at-a-glance summary, always up to date:

| CARD                  | WHAT IT SHOWS                                                                  |
|-----------------------|--------------------------------------------------------------------------------|
| Total Members         | Active members across all 12 branches.                                         |
| New This Month        | Members registered so far in the current calendar month.                       |
| Monthly Contributions | Total savings ("Subs") recorded this month, all branches combined.             |
| Total Emergency Fund  | Total emergency fund contributions recorded this month, all branches combined. |

## 5.3 Quick Actions

A row of shortcut tiles lets you jump straight to the most common tasks:

- **View All Members** — browse members from every branch.
- **Funeral / Emergency Collections** — browse one-off collections across all branches.
- **Business Activities** — track income and expenses for association-run ventures.
- **Generate Monthly PDF Report** — download the combined all-branch monthly ledger.
- **Generate Financial Summary PDF** — download the savings, emergency fund and business summary.

## 5.4 Recent Activity

A table at the bottom lists the five most recently added members (name, Member ID, branch, and date created). Click any member's name to open their full profile directly.

## 6. Managing Branches

UAE has 12 branches; this is where you work with any one of them.

### 6.1 The Branches list

Menu → **Branches**

This page shows every branch as a card, with its name and how many active members it currently has. Click **View Members** on any card to open that branch.

### 6.2 Inside a branch

Opening a branch shows a **Quick Actions** panel and a **Members** table for that branch only.

#### Quick Actions available for each branch

| ACTION                   | WHAT IT DOES                                                                                                                                                                   |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Open Contribution Sheet  | Opens this branch's monthly savings/emergency sheet for the current month (see Section 8).                                                                                     |
| Add New Member           | Opens the "Add New Member" form, pre-filled for this branch (see Section 7.2).                                                                                                 |
| Funeral Collection Sheet | Opens this branch's funeral/emergency collection sheet (see Section 9).                                                                                                        |
| Download Blank Sheet     | Downloads a printable, empty collection sheet PDF listing all this branch's members in their sheet order — useful for collecting contributions on paper at a physical meeting. |

#### The Members table

Lists every active member in the branch with their row number (position on the physical sheet), Member ID, full name, phone number, and status badge (Active / Suspended / Inactive). Click **View** on any row to open that member's full profile (Section 7.4).

## 7. Managing Members

Adding, searching, updating, and removing member records.

### 7.1 Viewing and searching all members

Menu → All Members

This page lists every member across every branch. Use the filters bar to narrow the list:

- **Branch** dropdown — choose a branch, or leave on "All Branches".
- **Search Members** box — type any part of a name or Member ID; results update automatically as you type.

The table shows Member ID, Full Name, Phone, Branch, and Status. Click **View** to open a member's profile. Two buttons at the top right, **Import Members** and **Add Member**, start the two ways to add new members (below).

### 7.2 Adding a single member

Menu → All Members → **Add Member** (or a branch page → Add New Member)

- 1 If you arrived from "All Members", choose the **Branch** the member belongs to. If you arrived from inside a specific branch, the branch is already fixed and shown for you.
- 2 Enter the member's **Full Name**.
- 3 Enter their **Phone Number** in Kenyan format, e.g. **07XXXXXXXX**. This will double as their initial login password, so make sure it is correct.
- 4 Check the **Row No. (Sheet Position)** field — it is automatically filled with the next open row for that branch. Change it only if this member needs to sit at a specific row to match the physical paper sheet.
- 5 Optionally enter their national **ID Number**.
- 6 Click **Create member**.

#### AFTER A MEMBER IS CREATED

A green confirmation panel shows the new **Member ID** (with a **Copy** button) and states that their **initial password is their phone number**. Give this Member ID and phone number to the new

member — they will be required to set their own new password the first time they log in. Click

**Add another member** to add the next person.

#### DUPLICATE PROTECTION

The system blocks a new member from being created with a phone number or full name that already exists (matching is not case-sensitive for names). If this happens, you'll see which existing Member ID the entry conflicts with.

## 7.3 Adding many members at once (CSV import)

Menu → All Members → **Import Members**

Use this when you have a list of new members ready in a spreadsheet, rather than typing them one by one.

### Preparing your file

Your file must be a **.csv** file with exactly two columns, in this order, with this exact header row:

**full\_name**, **phone**

Every row below the header needs both a name and a phone number — the import will refuse the whole file if any row is missing one.

### Steps

- 1 Choose the **Branch** that all members in this file belong to.
- 2 Click **Choose CSV** and select your file (or use the file box directly).
- 3 Click **Upload & Preview**. A preview table appears showing every row that will be created, with a running count.
- 4 Check the preview carefully. If something looks wrong, fix your CSV file and repeat from step 2.
- 5 Click **Confirm Import**. A progress indicator appears while members are created one by one.

#### WHY BULK IMPORTS TAKE A WHILE

To keep the system's account-creation service healthy, each member in the batch is created roughly three seconds apart. A batch of 20 members therefore takes about a minute. Please leave the page open until you see the final summary — don't close the tab partway through.

When the import finishes, a summary shows how many members were **created** successfully and how many **failed**, with a reason for each failure (for example, a duplicate phone number) so you can fix and re-import just those rows.

## 7.4 Viewing and editing a member's profile

Open any member (via a branch's member list, All Members, or Recent Activity on the dashboard) to see their full profile.

### Summary card

At the top: Phone, Status, Created date, and ID Number.

### Profile form

Editable fields, saved with the **Save Profile** button:

- **Full Name**, **Phone**, **ID Number**
- **Status** — Active, Inactive, or Suspended. Changing this affects whether the member appears in branch lists and monthly sheets.
- **Sheet Position (Row No.)** — the member's row on the physical paper sheet.
- **KBG Shares (legacy)** — a one-time historical dividend figure from an old association project. This is set once and does not change month to month.

### Family Details tab

Click **Add** or **Edit** to record: Marital Status, Employment Status, Occupation, Residential Location, Home District/Location/Village, and Spouse details (Name, District, Location, Sub-location, Village, ID Number). A separate list lets you add each of the member's **children** (Full Name and Age), with a delete option per child.

### Beneficiary Declaration tab

Records who should benefit from the member's welfare entitlements: Father's and Mother's Name / Date of Birth / ID Number / Status (Alive or Deceased), Guardian's Name / Date of Birth / ID Number, and the nominated Beneficiary's Full Name / Date of Birth / Mobile Number / Relationship to the member.

## 7.5 Deleting a member

At the bottom of a member's profile, click **Delete Member**. A confirmation window shows the member's name and Member ID and asks you to confirm with **Delete Permanently**, or **Cancel** to back out.

### THIS CANNOT BE UNDONE

Deleting a member permanently removes their record. Their Member ID is **recycled** — the next new member created will automatically reuse the lowest available recycled ID. Only delete a member you are certain should be removed.

## 8. Monthly Contribution Sheets

The heart of the system — where each branch's monthly savings and emergency fund figures are recorded.

Every branch has one contribution sheet per calendar month, listing every active member as a row. This mirrors the paper collection sheets branches have always used, but the totals and running balances are now calculated for you automatically.

### 8.1 Opening a sheet

*Branches* → *a branch* → **Open Contribution Sheet**

- 1 At the top of the sheet page, choose the **Branch** and **Month** you want.
- 2 If this is the first time this branch/month combination has been viewed, click **Open Sheet**. This creates a row for every active member automatically (and adds rows for any members added later, without disturbing existing entries). The button then reads "Sheet Opened".

### 8.2 Understanding the columns

| COLUMN               | MEANING                                                                  | EDITABLE? |
|----------------------|--------------------------------------------------------------------------|-----------|
| No.                  | The member's row position on the physical sheet.                         | —         |
| Name                 | Member's name and Member ID.                                             | —         |
| KBG Shares B/F       | The one-time legacy dividend figure (see Section 7.4). Rarely changes.   | Yes*      |
| Old Savings B/F      | Historical closing balance carried in from before the portal existed.    | Yes*      |
| Previous Balance B/F | Balance carried forward from last month's savings.                       | Yes*      |
| Subs                 | This month's savings contribution.                                       | Yes       |
| Cumulative Saving    | Old Savings B/F + Previous Balance B/F + Subs. Calculated automatically. | —         |
| Previous Emerg B/F   | Emergency fund balance carried forward from last month.                  | Yes*      |

|                       |                                                               |     |
|-----------------------|---------------------------------------------------------------|-----|
| Emerg Subs            | This month's emergency fund contribution.                     | Yes |
| Cumulative Emerg Fund | Previous Emerg B/F + Emerg Subs. Calculated automatically.    | —   |
| Withdrawal            | Any amount withdrawn from the emergency fund this month.      | Yes |
| Emergency Balance     | Cumulative Emerg Fund – Withdrawal. Calculated automatically. | —   |

\* These "brought-forward" columns are locked after the member's very first month on the sheet, because they normally carry forward automatically. See 8.3 below on how to correct them if genuinely needed.

### 8.3 Editing and saving

- 1 Click into any editable box and type the figure.
- 2 The Cumulative Saving, Cumulative Emerg Fund and Emergency Balance columns, and the totals row at the bottom, update instantly as you type — nothing is saved yet.
- 3 When you're done with a row, or the whole sheet, click **Save** at the top of the table. A confirmation message appears once saved.

#### Correcting a brought-forward figure

If a member's KBG Shares B/F, Old Savings B/F, or Previous Balance B/F figure is genuinely wrong for a month after their first, click **Fix brought-forward figures** at the end of that row to unlock it for editing, then correct the value and click **Save** as usual.

### 8.4 If the numbers look wrong somewhere

Every time a sheet is opened, the system automatically re-checks and heals the brought-forward figures for that month. If you still believe the running balances for a branch have gone wrong over several months, there is a recovery tool at the bottom of the sheet page:

**Numbers look wrong somewhere? Reset a branch forward from a month...**

#### USE WITH CARE

Opening this and clicking **Reset Forward** recalculates **every month after the one you pick**, for every member who has a row there, and clears any manual brought-forward corrections in that range. The month you pick itself is never changed. Only use this if something looks genuinely wrong — it is not needed for normal month-to-month use.

## 8.5 Downloading a blank sheet

From a branch's page, click **Download Blank Sheet** to get a printable PDF listing every active member in that branch, in sheet order, with empty columns — handy for collecting figures on paper during a physical branch meeting before typing them into the portal afterwards.

## 9. Funeral & Emergency Collections

One-off collections for a specific funeral or emergency event, separate from the regular monthly emergency fund.

### 9.1 Browsing across all branches

Menu → **Funeral Collections**

This combined view lists every collection recorded, across every branch, with a running **Grand Total**. Filter using:

- **Search Event** — matches the event description.
- **From** / **To** — a date range.

### 9.2 Recording a new collection

Branches → a branch → **Funeral Collection Sheet**

- 1 Enter an **Event Description** (for example, "Death of Jane's father").
- 2 Set the **Collection Date**.
- 3 For each member who contributed, enter their **Amount** and choose the **Source**: **Cash**, or **From Emergency Fund** (drawn from that member's own emergency fund balance instead of paid in cash).
- 4 Click **Save All**.

### 9.3 Editing or removing a past event

Below the entry table, a **Past Events** list shows every event previously recorded for this branch, with its date, total, and number of contributing members. For any event you can:

- Click **Load / Edit** to bring its entries back into the form above for changes, or to add more members to it.
- Click **Delete event** to remove the entire event and all its entries at once.
- Once an event is loaded, a **Remove** button appears next to each member who has an entry, to remove just that one person's contribution.

**THIS CANNOT BE UNDONE**

Deleting an event or a single row is permanent.

## 10. Business Activities (Ventures)

---

Tracking income and expenses for association-run business activities, such as the van hire business.

### 10.1 The ventures list

Menu → **Business Activities**

Shows every business venture as a card. Click a card to open its transaction log.

### 10.2 Recording a transaction

- 1 Choose the **Month** you're recording for.
- 2 Set the **Date** of the transaction.
- 3 Choose the **Type**: Income, Fuel, Driver Payment, Maintenance, or Other Expense.
- 4 Add an optional **Description**.
- 5 Enter the **Amount**.
- 6 Click **Add Transaction**.

### 10.3 Reading the log

Transactions are grouped by type, each with its own subtotal. A **Monthly Summary** panel at the bottom shows Total Income, Total Expenses, and Net Profit / Loss for the selected month.

## 11. Generating Reports

---

Official PDF reports you can download, print, or share with the committee.

### 11.1 Monthly Ledger Report

Menu → **Monthly Ledger Report**

Choose a **Month** and click **Generate PDF**. The report covers every branch, with per-branch tables, branch totals, and association-wide grand totals. Branches with no entries that month are clearly marked "No entries recorded".

### 11.2 Financial Summary

Menu → **Financial Summary**

- 1 Choose **Monthly** or **Annual** using the toggle at the top.
- 2 Pick the **Month** (or **Year** for an annual report).
- 3 Click **Generate PDF** (or **Generate Annual PDF**).

This report combines savings, emergency fund movements, and business venture performance into a single document.

#### TIP

Reports download straight to your device (usually into a "Downloads" folder) just like any other PDF file, ready to print, email, or share.

## 12. Announcements

---

Send a message to all members, or to selected branches only.

*Menu* → **Announcements**

### 12.1 Creating one

- 1 Click **New Announcement**.
- 2 Enter a **Title** and the **Message** body.
- 3 Choose the **Target audience**: **All Members**, or **Specific Branches** (tick the branches that should see it).
- 4 Click **Create Announcement**.

### 12.2 Managing existing announcements

Every announcement is listed with its audience, creation and last-updated time. Use **Edit** to change it, or **Delete** to remove it (you'll be asked to confirm).

## 13. Constitution

---

A read-only reference document.

*Menu* → **Constitution**

Opens the association's constitution for reference. This is a read-only document — there is nothing to fill in here.

## 14. Account Settings & Logging Out

---

Keeping your own login secure.

### 14.1 Changing your password

Menu → **Settings**

- 1 Enter your **Current Password** .
- 2 Enter a **New Password** .
- 3 Re-enter it in **Confirm New Password** .
- 4 Click **Update password** .

You'll see a confirmation message once your password has been updated.

### 14.2 Logging out

Open the navigation menu and click **Logout** at the bottom. Do this whenever you finish using a shared or public computer.

## 15. Working Offline

---

What still works without a signal, and what doesn't.

If your connection drops, you'll see an amber banner reading *"You're offline. Reconnect to the internet to save changes."* You can still browse pages you've already opened, but any button that saves or changes data (Save, Create member, Add Transaction, and so on) will be disabled until your connection returns. Nothing is lost — simply reconnect and try again.

## 16. Tips, Good Practice & Troubleshooting

### 16.1 Good practice

- Double-check phone numbers when adding members — the phone number becomes the member's initial password, so an error here can lock them out.
- Save your work often, especially on the contribution sheet, rather than typing a whole branch and saving once.
- Never share your own administrator password with anyone, including members.
- When correcting brought-forward figures, use the "Fix brought-forward figures" link on individual rows before reaching for the branch-wide "Reset Forward" tool.

### 16.2 Troubleshooting

| PROBLEM                             | WHAT TO TRY                                                                                                                   |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Forgot your password                | There is no self-service reset in the portal. Contact the person who manages the system for the association to have it reset. |
| A page looks empty or stuck loading | Check your internet connection, then refresh the page.                                                                        |
| A save button is greyed out         | You're likely offline — check for the amber offline banner and reconnect.                                                     |
| A new member can't log in           | Confirm their Member ID and that the phone number on file matches exactly what they're typing as their password.              |
| CSV import fails immediately        | Confirm the file has exactly two columns, headed <b>full_name</b> and <b>phone</b> , with no blank rows.                      |
